

# ENREKON DYNAMIC FORECAST SOLUTION

## Introducing Our **AI-Based Forecasting Solution**

Stay ahead of economic, energy, and commodity market trends with our cutting-edge, AI-powered forecasting tool. Designed to provide accurate and real-time insights, our system enables users to make informed decisions in an ever-changing landscape.

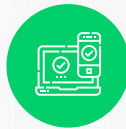

## Key Features

### Multidimensional Forecasting

Forecasts prices for major energy sources, including natural gas, oil, power and more.

Covers essential macroeconomic indicators such as GDP, interest rates, inflation and more.

### Standardized & Accessible

Available online with transparent pricing.

Features a dashboard with customizable variables to create tailored scenarios.

### Dynamic & Adaptive

Uses AI and advanced machine learning algorithms to continuously update forecasts with the latest data.

Adjusts predictions in real-time to reflect emerging market conditions.

### Fully Automated & Consistent

Eliminates human bias with a completely automated forecasting process.

Ensures reliability and accuracy across all predictions.

### Unique Predictive Capabilities

Goes beyond historical data analysis by evaluating current market behaviors (i.e. sentiment analysis).

Anticipates potential market shifts and events before they occur.

## HOW IT WORKS

1

### Try Before You Buy:

Customers can access a demo phase to explore the platform.

2

### Flexible Subscription Model:

After the demo, users can purchase access for a set period based on their preferences.

3

### Scalability for All Users:

Customers with only periodic needs can generate custom forecasts based on selected variables.

4

### Seamless Excel Integration:

An Excel add-in allows users to import data directly into Excel, ensuring their custom-built models update automatically with the latest forecasts.

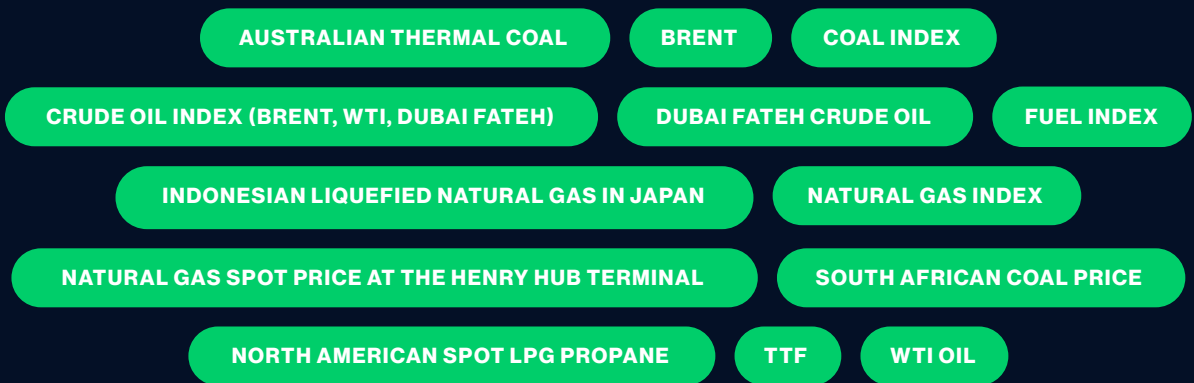

**Our AI-driven forecasting model consistently outperforms price predictions derived from futures markets, providing more accurate and timely insights for decision-makers.**
